-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/240654, filed on 10/3/2002.

Status of Application

1. The claim 13 is pending and presented for the examination.

Information Disclosure Statement(IDS)

The information disclosure statement (IDS) is submitted on 4/23/2004. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. Please refer to applicants' copy of the 1449 submitted herewith.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by Wai-Chiu So et al(US6946120).

The claim is drawn to a method for preventing precipitation of minoxidil, which comprises incorporating 8 to 30% mass of a polyhydric alcohol in a composition containing 10 to 50% by mass of water and 3% or more by mass of minoxidil and adjusting the composition to a pH of 5.5 to 6.5.

Wai-Chiu So et al(US'120, hereinafter) teaches a composition containing a as an active agent, polyhydric alcohol and water, see abstract. US'120 further teaches the pH of solution about 6.0 to 6.5, see col. 2, lines 21. The amount of active agent, piperidinopyrimidine compound such as minoxidil is present in about 5 to 25%, see col. 2, line 62-65. The amount of polyhydric alcohol such as 1,3-dibutylene glycol or dipropylene glycol is present in about 10%, see col. 2, lines 40-46. The amount of water is present in about less than 60%, see col. 2, lines 58-59.

Most importantly, there is substantially complete solubilization of active agent, a piperidinopyrimidine compound such as minoxidil and no precipitation found in said patented solution of US'120, see col. 1, lines 56-58.

All the critical elements are well taught and all the claims are clearly anticipated by the cited reference.

Conclusion

1. No claim is allowed.
